## HOW TO HELP SOLVE THE UNEMPLOYMENT SITUATION

Municipalities, park boards, school boards, county and state institutions, public buildings, civic clubs, etc., should be quick to take advantage of the unusual opportunity to help relieve the distressing unemployment situation and at the same time secure landscape work and all other beautification projects cheaper than ever before. Just now there is a surplus of ornamental stock and prices are very low, in fact lower than they have been in many years and lower than they are likely ever to be again in the future. Nurserymen will not continue to put in new stocks if they have to grow them at a loss, and already many nurserymen all over the country are going out of business.

To our customers in the North and East where our trade has greatly increased in the last few years, we are able with our rich soil and long growing season to produce nursery stock to certain grades in about one-half the time required in your localities, and with our cheap labor, we can deliver first class stock at a very low price. The elevation and altitude of Fort Worth are sufficient to cause the stock to ripen up thoroughly by winter, putting it in good condition for handling, and also enabling it to become sufficiently hardened to withstand cold weather, which sometimes is not the case with stock grown further south.

**PRICES:** A glance at the following list will show that we have greatly reduced our prices. Never before have we offered such bargains.

**TERMS:** 60 days to people of approved credit. To others, cash with order, or if shipped C. O. D. one-fourth cash should be sent. When cash accompanies the order we make no charge for packing.

**PRICES** on Conifers include Ball and Burlap.

Packing extra at cost.

Packing free in car lots, and 10% off list on evergreens and shade trees.

With good roads in every direction delivery by truck is very satisfactory. For distances of 250 miles from Fort Worth we will make free delivery in full truck loads.

Shade trees and shrubs may be shipped by express or freight in small or large lots. Small evergreens for lining out should go by express.

Whenever possible the purchaser should come to the nursery to select stock, as it must be seen to be fully appreciated. Visitors always welcome. If you come by auto, go out East Third Street and follow the street car line right to our office. If by street car, take any car and ask for transfer to the Riverside line, getting off at Third and Main; walk one block east where you get the street car which runs through our nursery.

## Lining Out Evergreens

We have several hundred thousand field grown lining out Biotas and Junipers which must be moved this season, and for this reason we are offering them at extremely low prices, as listed below. These plants are in prime condition, grown in the open field, cultivated with the plow; are well spaced, and are far superior to plants grown in beds. The plants listed as bench grown, have been transplanted and spaced in the benches and are not to be compared with ordinary rooted cuttings. They have well ripened foliage, strong stems and a fine root system. They may be transplanted directly into the field. Nurserymen should stock up on this class of stock while prices are low. We, in common with most other growers, will doubtless quit propagating until the demand and prices justify a resumption.

Per 1000

## Perennials

<b>SALVIA LEUCANTHIA</b> , hardy Mexican Sage. A most beautiful plant, lately introduced. Grows four feet high, covered in the fall with a profusion of flower spikes of rich velvety purple. Field grown clumps 30 cents each, \$3.00 per dozen. Pot plants in spring \$12.00 per 100.
<b>HARDY ASTER</b> . Tall growing, late blooming variety of exceptional beauty. Light lavender. Field grown clumps \$3.00 per dozen. Pot plants in spring \$10.00 per 100.
<b>GERMAN IRIS</b> . Assorted named varieties. \$10.00 per 100.
<b>PERENNIAL PHLOX</b> . Several of the best leading varieties. \$10.00 per 100.
<b>HEMEROCALLIS</b> . Extremely hardy, free blooming. \$10.00 per 100.
